Then throwing carbolic acid in her face, hurled her from the room. A gentleman who roomed in the house came to her rescue and aided her in removing the acid from her face and clothing. Though the fluid remained but a few moments upon her flesh, her face was severely burned, and she was nearly blinded. Spencer was arrested.

Yellow Fever at Biloxi.

NEW ORLEANS, October 27.—There is some anxiety here about the situation at Biloxi. No word has been received by the papers here about the yellow fever at that place for several days. The wires are working all right. It is conjectured that the correspondents have been induced by the citizens of the town not to send out reports. Biloxi is completely shut off from all communication with the rest of the world except by wire, the quarantine being absolute. This is likely to be the case until there comes a heavy frost.

THE STATUE.

THE FRENCH DELEGATES AND THEIR AMERICAN FRIENDS

Doing New York—Arrival of the Presidential Party to Witness the Unveiling To-Day.

NEW YORK, October 27.—The City Hall, resplendent with bunting and flags of all nations, was the scene to-day of a formal reception to the French delegates, when the freedom of the city was presented to them.

The hour appointed for the reception was one o'clock, but the disagreeable weather was a decided drawback to the ceremonies, and it was two o'clock before the affair began.

Mayor Grace presented M. Bartholdi and the delegates to the president of the Board of Aldermen in the chamber of the Board, which was beautifully decorated with flags and emblems. The Mayor made a short address of welcome in behalf of the Common Council of New York, and alluded to the prominent part France had in establishing our liberty.

The clerk read the resolutions granting the freedom of the city to the French guests, and M. Bartholdi answered the Mayor.

M. Bartholdi spoke in English, with some difficulty, and said: "I am deeply moved by all the kindness shown me by your people. If I look at my work I feel somewhat averse to accepting so much honor, for I cannot forget my fellow-helpers in this city, for such I must call you."

He was followed by M. Deschamps, who spoke in French. He compared our city government to that of Paris, and said that he intended to note our peculiar institutions, and, if possible, introduce reforms in the municipal government of Paris. After the Mayor had signed the resolutions granting the visitors the freedom of the city the meeting adjourned, and the company left the City Hall with the Mayor to make a tour of the city's institutions, etc.

Departure of the President.

WASHINGTON, D. C., October 27.—The President's party, who will assist in the inauguration of the Bartholdi Statue in New York to-morrow, left Washington this afternoon at 3:50 o'clock, and expect to return by midnight Thursday. The party consisted of the President, the Secretary of State, Secretary of the Navy, Postmaster-General, and Colonel Lamont.

[Second Dispatch.]

THE PRESIDENT IN NEW YORK.

NEW YORK, October 27.—The presidential party reached Jersey City at 9:15 P. M. The trip from Washington was without incident, and as but few brief stops were made there was no opportunity for demonstration. Quite a crowd had gathered at the station in Jersey City to see the distinguished party, but the President, accompanied by the station-master, and followed by Secretaries Bayard, Whitney, Lamar, Postmaster-General Vilas, and Colonel Lamont proceeded directly to carriages which were awaiting them. Secretary Whitney will entertain the party to-night at his residence on Fifth avenue.

A Ride To Death.

MADISON, WIS., October 27.—The East-bound passenger train on the Northwestern road collided with a wild engine yesterday in a deep cut fifteen miles west of here. Henry Schwenk, who was stealing a ride, was crushed to death, and three railroad employees were badly hurt, one, it is thought, fatally. The engineer of the wild engine, which was backing, jumped after reversing the lever, but before doing so the tender was thrown upon the engine of the passenger train, and the locomotive broke away and dashed eastward with no one on board. It ran to Verona, about six miles distant, where it was stopped. It was said that the blame attaches to the engineer of the wild engine.

Disastrous Freight Wreck.

CEDAR LAKE, IND., October 27.—A disastrous freight wreck occurred on the Louisville, New Albany and Chicago railroad at 3:30 o'clock this morning. A heavy train of mixed freight for Chicago, principally coal and cattle, was rounding an abrupt curve, when a lighter freighted train overtook and crashed into it. The caboose in the rear of the first train was wrecked and quickly commenced burning. Two men were burned to death in the ruins and several others seriously injured. The dead are supposed to be stock men. The wreck was burning when the passengers of train due at Chicago at 7:40 were transferred across at 9 o'clock.

Coppers and Nickels.

WASHINGTON, October 27.—An enormous demand for one-cent and five-cent pieces has sprung up all over the country within the past four months. On October 25th the demand was ahead some \$180,000.

Every Democrat to the Front.

In every campaign, no matter how popular the candidate may be, some Democrats will say in a very positive manner that they will not vote. But before the election-day comes they see their mistake and fall in line. In the present campaign in this district the usual "kickers," of course, were found at the beginning, but now there are few intelligent citizens indeed who have not determined to vote for the Democratic standard-bearer.—*The State*.

NEW YORK STOCK MARKET.

REVIEW.

NEW YORK, October 27.—At the opening to-day there seemed to be considerable orders to sell from London, and the bears getting wind of this, offered the whole list down.

To-day being the first day of the fortnightly account there, some stocks may have been sold here in order to avoid carrying over. But they have been absorbed here. Considering that to-morrow is practically a holiday in many branches of business, and that the best portion of next week will be devoted to local elections, the way in which values hold their own without being artificially sustained argues well for them. We see nothing to cause us in any way to change our opinions. Traffic returns from every section are surprisingly good, and they must be a fair index of the status of trade throughout the country. The market closed steady. Money, 6 per cent.
